# M.Sc., COMPUTER SCIENCE

# **Program Code: PCS**

### MANNAR THIRUMALAI NAICKER COLLEGE (AUTONOMOUS)

Re-accredited with "A" Grade by NAAC PASUMALAI, MADURAI – 625 004

#### **Eligibility for Admission**

Candidate for admission to Master's degree course in Computer Science should have Higher Secondary (+2) level Mathematics with Bachelor's degree in Computer Science/ Information Technology or BCA of Madurai Kamaraj University or any other University recognized by the Syndicate of Madurai Kamaraj University as equivalent thereto.

Candidate should have passed the Degree with a minimum of 55% marks in Part-III. In case of SC/ST candidates, they should have passed the degree with a minimum of 50% marks in Part-III.

#### **Duration of the course**

The duration of the course shall be two academic years comprising four semesters with two semesters in each academic year.

#### **Subjects of Study**

The courses offered under the PG programs belong to the following categories:

- 1. Core Subjects
- 2. Electives
- 3. Non Major Electives (NME)

Pattern of the question paper for the Continuous Internal Assessment Note: Duration – 1 hour 30 minutes

The components for continuous internal assessment are:

Part -A

Four multiple choice questions (answer all)  $4 \times 01 = 04$  Marks

Part -B

Three short answers questions (answer all)  $3 \times 02 = 06 \text{ Marks}$ 

Part -C

Two questions ('either .... or 'type) 2 x 05=10 Marks

Part -D

Two questions out of three  $2 \times 10 = 20 \text{ Marks}$ 

------

Total 40 Marks

#### The scheme of Examinations:

The components for continuous internal assessment are:

(40 Marks of two continuous internal assessments will be converted to 15 marks)

Two tests and their average --15 marks
Seminar /Group discussion --5 marks
Assignment --5 marks

Total 25 Marks

#### Pattern of the question paper for the Summative Examinations:

**Note: Duration- 3 hours** 

Part -A

Ten multiple choice questions  $10 \times 01 = 10 \text{ Marks}$ 

No Unit shall be omitted: not more than two questions from each unit.)

Part -B

Short answer questions (one question from each unit)  $5 \times 02 = 10$  Marks

Part –C

Five Paragraph questions ('either .... or 'type)  $5 \times 05 = 25 \text{ Marks}$ 

(One question from each Unit)

Part -D

Three Essay questions out of five  $3 \times 10 = 30 \text{ Marks}$ 

(One question from each Unit)

Total 75 Marks

#### **Minimum Marks for a Pass**

50% of the aggregate (Internal +Summative Examinations).

No separate pass minimum for the Internal Examinations.

34 marks out of 75 is the pass minimum for the Summative Examinations.

#### **VISION**

To inculcate the students professionally sound in computer efficacy with sufficient soft skills and to be in par with the industry demands.

#### **MISSION**

To develop firm in computer concepts and design with practical skills to the students.

#### The 12 Graduate Attributes\*:

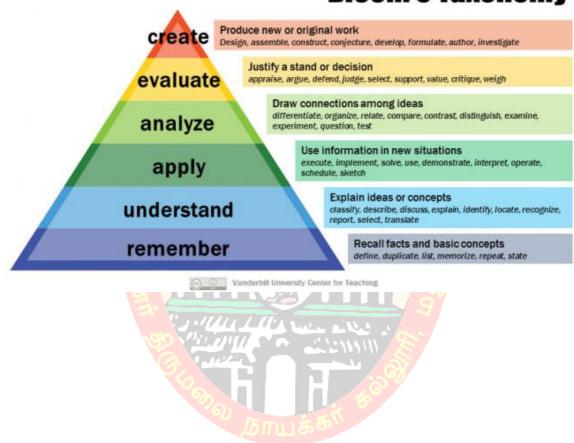

- 1. (KB) A knowledge base for engineering: Demonstrated competence in university level mathematics, natural sciences, engineering fundamentals, and specialized engineering knowledge appropriate to the program.
- 2. (PA) Problem analysis: An ability to use appropriate knowledge and skills to identify, formulate, analyze, and solve complex engineering problems in order to reach substantiated conclusions
- 3. (Inv.) Investigation: An ability to conduct investigations of complex problems by methods that include appropriate experiments, analysis and interpretation of data and synthesis of information in order to reach valid conclusions.
- 4. (Des.) Design: An ability to design solutions for complex, open-ended engineering problems and to design systems, components or processes that meet specified needs with appropriate attention to health and safety risks, applicable standards, and economic, environmental, cultural and societal considerations.
- 5. (Tools) Use of engineering tools: An ability to create, select, apply, adapt, and extend appropriate techniques, resources, and modern engineering tools to a range of engineering activities, from simple to complex, with an understanding of the associated limitations.
- 6. (Team) Individual and teamwork: An ability to work effectively as a member and leader in teams, preferably in a multi-disciplinary setting.
- 7. (Comm.) Communication skills: An ability to communicate complex engineering concepts within the profession and with society at large. Such ability includes reading, writing, speaking and listening, and the ability to comprehend and write effective reports and design documentation, and to give and effectively respond to clear instructions.
- 8. (Prof.) Professionalism: An understanding of the roles and responsibilities of the professional engineer in society, especially the primary role of protection of the public and the public interest.
- 9. (Impacts) Impact of engineering on society and the environment: An ability to analyze social and environmental aspects of engineering activities. Such ability includes an understanding of the interactions that engineering has with the economic, social, health, safety, legal, and cultural aspects of society, the uncertainties in the prediction of such interactions; and the concepts of sustainable design and development and environmental stewardship.
- 10. (Ethics) Ethics and equity: An ability to apply professional ethics, accountability, and equity.

- 11. (Econ.) Economics and project management: An ability to appropriately incorporate economics and business practices including project, risk, and change management into the practice of engineering and to understand their limitations.
- 12. (LL) Life-long learning: An ability to identify and to address their own educational needs in a changing world in ways sufficient to maintain their competence and to allow them to contribute to the advancement of knowledge

WA	Graduate Attributes	Caption as
WA1	Demonstrated competence in university level mathematics, natural sciences, engineering fundamentals, and specialized engineering knowledge appropriate to the program.	Knowledge Base
WA2	An ability to use appropriate knowledge and skills to identify, formulate, analyze, and solve complex engineering problems in order to reach substantiated conclusions	Problem Analysis &
WA4	An ability to conduct investigations of complex problems by methods that include appropriate experiments, analysis and interpretation of data and synthesis of information in order to reach valid conclusions.	Investigation
WA10	An ability to communicate complex engineering concepts within the profession and with society at large. Such ability includes reading, writing, speaking and listening, and the ability to comprehend and write effective reports and design documentation, and to give and effectively respond to clear instructions.	Communication Skills & Design
WA3	An ability to design solutions for complex, open-ended engineering problems and to design systems, components or processes that meet specified needs with appropriate attention to health and safety risks, applicable standards, and economic, environmental, cultural and societal considerations.	Skins & Design
WA9	An ability to work effectively as a member and leader in teams, preferably in a multi-disciplinary setting.	Individual and Team Work
WA6	An understanding of the roles and responsibilities of the professional engineer in society, especially the primary role of protection of the public and the public interest.	Professionalism, Ethics and equity
WA8	Ethics and equity: An ability to apply professional ethics, accountability, and equity.	Dimes and equity
WA12	(An ability to identify and to address their own educational needs in a changing world in ways sufficient to maintain their competence and to allow them to contribute to the advancement of knowledge	Life long learning
WA5	An ability to create, select, apply, adapt, and extend appropriate techniques, resources, and modern engineering tools to a range of engineering activities, from simple to complex, with an understanding of the associated limitations.	Usage of Tools
WA7	An ability to analyze social and environmental aspects of	Impact on Society

	engineering activities. Such ability includes an understanding of the interactions that engineering has with the economic, social, health, safety, legal, and cultural aspects of society, the uncertainties in the prediction of such interactions; and the concepts of sustainable design and development and environmental stewardship.	
WA11	An ability to appropriately incorporate economics and business practices including project, risk, and change management into the practice of engineering and to understand their limitations	Project Management

# **Bloom's Taxonomy**

PROGE	RAM EDUCATIONAL OBJECTIVES (PEOs)					
PEO1:	Post Graduates are prepared to apply broad knowledge of Computer Science and a focused understanding of their area of expertise					
PEO2:	Post Graduates will be capable of pursuing professional careers or to take up research programmes.					
PEO3:	Post Graduates are prepared to survive in rapidly changing technology and engage in lifelong learning.					
PEO4:	Post Graduates will be able to develop team work capability so that they can work on multidisciplinary projects and exhibits high level of professional and ethical values.					
PEO5:	Post Graduates will be able to engage in sustainable development and demonstrate data analysis skills for effective interpretation and decision making to solve real life problems.					

PROG	GRAMME OUTCOMES (POs)						
<b>PO1</b> :	Demonstrate analytical and practical knowledge in the field of Science, Technology and						
	other domains.						
<b>PO2</b> :	Express their disciplinary knowledge with others effectively in both oral and written						
	form in an organized manner.						
<b>PO3</b> :	Make proficiency by using Computer Technology in learning activities and update their						
	knowledge, skills to fulfill the requirements at the workplace in their life span.						
<b>PO4</b> :	Employ critical and analytical thinking in understanding the concepts of Mathematical						
	& Computing Sciences and qualify competitive examinations like CSIR NET/ SET/						
	TET etc.						
<b>PO5</b> :	Identify Mathematical and Computational methods in order to solve critical problems.						
<b>PO6:</b>	Work independently and do detailed study of various concepts of Science.						
<b>PO7:</b>	Plan, execute, report the results of an experiment/investigation together as a group/team						
	with interest and work efficiently as a member of a team.						

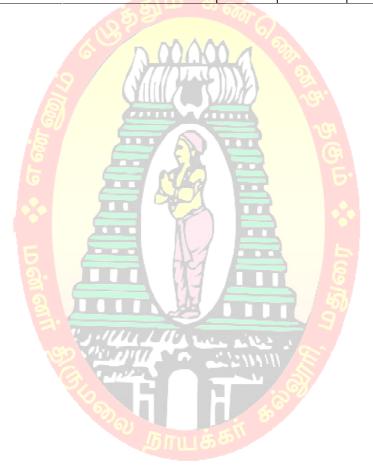

PROG	RAM SPECIFIC OUTCOME (PSOs)
<b>PSO1</b> :	Possess strong foundation on various dimensions of algorithms, networking and
	software development with social impact.
PSO2:	Acquire capabilities towards innovation and creativity in problem solving skills in IT
	industry.
<b>PSO3</b> :	Develop ability to communicate, comprehend and write effective reports and design
	documentation and effectively respond to clear instructions.
PSO4:	Work effectively as a member and leader in teams in multi-disciplinary setting and
	develop as a successful entrepreneur.
PSO5:	Develop and inculcate positive attitude to become a responsible good citizen by
	applying professional ethics, accountability with greater awareness about culture and
	value system.
PSO6:	Comprehend, explore and build up computer programs in the areas allied to Algorithms,
	Artificial Intelligence, Theory of Computation and Cyber Security for efficient design
	of computer-based systems of varying complexity.

# MANNAR THIRUMALAI NAICKER COLLEGE (AUTONOMOUS) DEPARTMENT OF COMPUTER SCIENCE

(For those who joined in 2021-2022 and after)

Course Name	ADVANCED WEB TECHNOLOGY						
Course Code	21PCSC11	L	P	C			
Category	Core	6	-	4			
Nature of course:	EMPLOYABILITY ✓ SKILLORIENTED ENTREPH	RENU	RSH	IP			

#### **COURSE OBJECTIVES:**

- Students are able to develop a dynamic webpage by the use of java script and DHTML
- Students will be able to write a well formed / valid XML document.
- Students will be able to connect a java program to a DBMS and perform insert, update and delete operations on DBMS table.
- Students will be able to write a server side java application called Servlet to catch form data sent from client, process it and store it on database.
- Students will be able to write a server side java application called JSP to catch form data sent from client and store it on database.

Unit: I	Web Essentials:		18 Hours

Clients, Servers, and Communication. The Internet-Basic Internet Protocols The World Wide Web-HTTP request message-response message-Web Clients Web Servers-Case Study. Markup Languages: XHTML. An Introduction to HTML History-Versions-Basic XHTML Syntax and Semantics Some Fundamental HTML Elements-Relative URLs-Lists-tables-Frames-Forms-XML Creating HTML Documents Case Study.

Unit: II Style Sheets: CSS – 18 Hours

Cascading Style Sheet Features-Core Syntax-Style Sheet and HTML-Style Rule Cascading and Inheritance-Text Properties-Box Model-Colors-Background Image-Normal Flow Box Layout-Beyond the Normal Flow-Other Useful Properties-Java Script-Basic Concepts-Variables and Data Types-Operators- Conditional Statement and Loops-Functions-Arrays-Standard Objects-Form Processing in JavaScript-JavaScript Debuggers.

# Unit: III Host Objects: 18 Hours

Browsers and the DOM-Introduction to the Document Object Model DOM History and Levels-Intrinsic Event Handling-Modifying Element Style-The Document Tree-DOM Event Handling Accommodating Noncompliant Browsers Properties of window-Case Study. **Server-Side Programming:** Java Servlets- Architecture -Overview-A Servelet-Generating Dynamic Content-Life Cycle-Parameter Data-Sessions-Cookies- URL Rewriting-Other Capabilities-Data Storage

Servelets and Concurrency-Case Study- Related Technologies.

#### **Unit: IV** | Representing Web Data-

18 Hours

Advantages of XML-Documents and Vocabularies-XML Version and XML Declaration-Namespace-DTD-Introduction to DOM and SAX-DOM based XML Processing-Event Oriented Parsing: SAX – XSLT: Displaying XML Documents in Browsers-Displaying XML Documents in Browser using CSS-Separating Programming and Presentation – The Problem with Servlet-The Anatomy of JSP Page-Working of JSP-JSP Application Design with MVC

#### Unit: V | Web Services -

18 Hours

Concept of web services-installation of a JWSDP-writing the Web-Service-Writing a java Web service client- WSDL-XML Schema-SOAP-Storing java Objects as files-Databases and Java Servlets.

#### Total Lecture Hours

90 Hours

#### **Books for Study:**

1. Jeffrey C.Jackson, "Web Technologies--A Computer Science Perspective", Pearson Education, 2006.

COUR	COURSE OUTCOMES:					
At the end of the Course the students will be able to						
CO1:	Understand the basic concepts of internet, internet standards and protocols.	K3				
CO2:	Develop a dynamic webpage by the use of java script and DHTML.	K3				
CO3:	Analyze, identify and define the technology required to build and implement a website	K4				
<b>CO4:</b>	Implement a web page using development tools to design a webpage	K4				
<b>CO5:</b>	Design a dynamic webpage.	K4

COUR	SE OUTCOMES:	K Level				
At the end of the Course the students will be able to						
CO1:	Analyze the running time and space complexity of algorithms.	K3				
CO2:	Describe, apply and analyze the complexity of divide and conquer strategy.	K3				
<b>CO3:</b>	Describe, apply and analyze the complexity of dynamic programming.	K4				
<b>CO4:</b>	Apply Greedy Technique for problem solving and identify the	K4				
	computational issues and apply suitable algorithms to solve it effectively.					
CO5:	Describe the classes P, NP, and NP Complete and be able to prove that a	K4				
	certain problem is NP-Complete

CO 5	2	2	2	2	2	3	

<sup>\*3 –</sup> Advanced Application; 2 – Intermediate Development; 1 - Introductory Level

### LESSON PLAN

UNIT	DESIGN AND ANALYSIS OF ALGORITHM	Hrs	Mode
I	Notion of an Algorithm – Fundamentals of Algorithmic Problem Solving – Important Problem Types – Fundamentals of the Analysis of Algorithm Efficiency – Analysis Framework – Asymptotic Notations and its properties – Mathematical analysis for Recursive and Non-recursive algorithms.	18	Black Board/ PPT
П	Brute Force – Selection sort and Bubble Sort-Closest-Pair and Convex-Hull Problems-Exhaustive Search - Divide and conquer methodology – Merge sort – Quick sort – Binary Tree Traversal and Related Properties – Multiplication of Large Integers – Strassen"s Matrix Multiplication-Closest-Pair and Convex-Hull Problems.	18	Black Board/ PPT
III	Three basic examples- Knapsack Problem and Memory functions-Optimal Binary Search Trees- Warshall"s and Floyd" algorithm.	18	Black Board/ PPT
IV	Greedy Technique— Prim"s algorithm- Kruskal's Algorithm-Dijkstra's Algorithm-Huffman Trees and codes. The Simplex Method-The Maximum-Flow Problem	18	Black Board/ PPT
V	Limitations of Algorithm Power: Lower-Bound Arguments-Decision Trees-P, NP and NP-Complete Problems- Challenges of Numerical Algorithms. Coping with the Limitations of Algorithm power: Approximation Algorithms for NP Hard Problems – Algorithms for Solving Nonlinear Equations.	18	Black Board/ PPT

#### **Course Objectives:**

- To understand the web technologies to create adaptive web pages for web application.
- To know the concept and implementation of cookies as well as related privacy concerns.
- Understand the web technologies to create adaptive web pages for web application.
- Use CSS to implement a variety of presentation effects to the web application
- Know the concept and implementation of cookies as well as related privacy concern

S. No.	List of Programs	Hours
1.	Write an HTML code to display your profile on a web page.	90
	Create a table to show your class time-table.	
2.	Insert an image and create a link such that clicking on image	
	takes user to other page	
3.	Write an HTML code to create a Home page having three links:	
	About Us, Our Services and Contact Us. Create separate web	
4.	pages for the three links.	
5.	Write an HTML code to create a Registration Form. On	
	submitting the form, the user should be asked to login with this	
	new credential.	
6.	Write an HTML code to create a login form. On submitting the	
	form, the user should get navigated to a profile page.	
7.	Write a JavaScript program to count the number of vowels in a	
	given string.	
8.	Write a java script program to test the first character of a string is	
	uppercase or not.	
9.	Write a pattern that matches e-mail addresses.	
10.	To write a program that parses an XML document using DOM	
	and SAX parsers.	
11.	To write a XML program and DTD for a document.	
12.	Create a web page with some text in using some color. Change	
	the color of the text on click of a button or on mouse over.	
	Client-side scripts for validating web form controls Using	
13.	DHTML	
	To write a XML program for creating a cd catalog.	
14.	To create an html page, and to apply style formatting using	
	external Cascading Style Sheet.	

15.	To write a servlet program using HTTP Servlet.	
	Total Lecture Hours	90

COURSE OUTCOMES:		
At the	end of the Course the students will be able to	
CO1:	Understand best technologies for solving web client/server problems	K2
CO2:	Analyze and design real time web applications	K4
CO3:	To have a Good grounding of Web Application Terminologies, Internet Tools, E – Commerce and other web services.	К3
CO4:	To develop a Web site using text, images, links, lists, and tables for navigation and layout.	K4
CO5:	To create web applications using web controls.	K4

### **LESSON PLAN**

S. No.	List of Programs	Hrs	Mode
1.	Write an HTML code to display your profile on a web page.	90	Lab
2.	Create a table to show your class time-table.		Demonstration
3.	Insert an image and create a link such that clicking on		2 0111011011011
	image takes user to other page		
4.	Write an HTML code to create a Home page having three		
	links: About Us, Our Services and Contact Us. Create		
	separate web pages for the three links.		
5.	Write an HTML code to create a Registration Form. On		
	submitting the form, the user should be asked to login with		
6.	this new credential.		
	Write an HTML code to create a login form. On submitting		
7.	the form, the user should get navigated to a profile page.		
	Write a JavaScript program to count the number of vowels		
8.	in a given string.		
	Write a java script program to test the first character of a		
9.	string is uppercase or not.		
10.	Write a pattern that matches e-mail addresses.		
	To write a program that parses an XML document using		
11.	DOM and SAX parsers.		
12.	To write a XML program and DTD for a document.		
	Create a web page with some text in using some color.		
	Change the color of the text on click of a button or on		
13.	mouse over.		
14.	Client-side scripts for validating web form controls Using		
	DHTML		
15.	To write a XML program for creating a cd catalog.		
	To create an html page, and to apply style formatting using		
	external Cascading Style Sheet.		
	To write a servlet program using HTTP Servlet.		

Course Designed by: Dr.S.Shaik Parveen & Dr.G.Devika

Nature of Course: EMPLOYABILITY   SKILL ORIENTED			✓	ENTREPRE	ENUR	SHI	P	

#### **COURSE OBJECTIVES:**

- Design and implement various algorithms in programming
- Employ various design strategies for problem solving.
- Measure and compare the performance of different algorithms
- Demonstrate a familiarity with major algorithms
- Apply important algorithmic design paradigms and methods of analysis.

S. No.	List of Programs	Hours
1.	Write program to perform Mathematical analysis for Recursive algorithm.	90
2.	Write program to perform Mathematical analysis Non-recursive algorithm.	
3.	Write program to Sort a given set of n integer elements using Quick Sort	
	method and compute its time complexity analysis: worst case, average case	
	and best case.	
4.	Write program to Sort a given set of n integer elements using Merge Sort	
	method and compute its time complexity analysis: worst case, average case	
	and best case.	
5.	Write program to implement Binary Tree Traversal	
6.	Write program to Implement the 0/1 Knapsack problem using Dynamic	
	Programming method.	
7.	Write program to Implement the 0/1 Knapsack problem using Greedy	
	method.	
8.	Write program, From a given vertex in a weighted connected graph, find	
	shortest paths to other vertices using Dijkstra's algorithm.	
9.	Write program to Find Minimum Cost Spanning Tree of a given connected	
	undirected graph using Kruskal'salgorithm.	
10.	Write program to Find Minimum Cost Spanning Tree of a given connected	
	undirected graph using Prim's algorithm	
11.	Write program to implement All-Pairs Shortest Paths problem using	
	Floyd's algorithm.	
12.	Write program to Implement Travelling Sales Person problem using	
	Dynamic programming.	
13.	Write program to Design and implement to find a subset of a given set S =	
	{S1, S2,,Sn} of n positive integers whose SUM is equal to a given	
	positive integer d	
14.	Write program Design and implement program to find all Hamiltonian	
	Cycles in a connected undirected Graph G of n vertices using backtracking	

15	principle.  Write program Design and implement program for N-Queen's Problem using backtracking principle.

## **LESSON PLAN**

UNIT	ADVANCE JAVA PROGRAMMING	Hrs	Mode
I	The Genesis of Java: Java's Lineage - Why java is important to Internet - Java's Magic - The JavaBuzz words. An overview of Java: Object-Oriented Programming - Data types, Variables and Arrays: Simple type - Variables - Type conversion and casting - Arrays Operators: Arithmetic- bit wise - relational - Logical - Assignment - ,,?" Operator - Operator Precedence Control statements - Selection - Iteration - Jump statements	18	Lecture and Chalk board instruction
II	Introducing Classes: Class fundamentals - Declaring objects -	18	Lecture
	Introducing methods - Constructors - this keyword - Garbage		and Chalk

	collection - finalize method. Inheritance: Basics - Using super -		board
	Multilevel Hierarchy - Method overriding - Abstract classes - final		instruction
	with inheritance. Packages and Interfaces: Packages - Access		
	protection - Importing Packages - Interfaces. Exception Handling:		
	Fundamentals - types - Uncaught exception - Nested try - throw -		
	throws - finally.		
III	Multithreaded Programming: Java Thread model - Main thread -	18	Lecture
	creating a thread - Multiple threads - priorities - Synchronization -		and Chalk
	I/O basics - reading/writing console - PrintWriter class - reading		board
	and writing files - The Applet class: Applet Basics - Applet		instruction
	Architecture - Applet Skeleton - Applet display methods -		
	Requesting - repainting - Status window - HTML APPLET tag -		
	Passing parameter to Applets.		
IV	Using AWT Controls, Layout managers and Menus: Control	18	Lecture
	fundamentals - labels, buttons, check boxes, choice controls, lists,		and Chalk
	scroll bar, textfield, textarea, layout manager, menubars and menus,		board
	dialog boxes - Handling events using AWT components. A tour of		instruction
	Swing: JApplet - Icons and Labels - Buttons - Combo Boxes -		
	Trees – Exploring Swing.		
V	Java Beans: What is a Java Bean? - Advantages of Java Bean -	18	Lecture
	Application Builder Tools – BDK – JAR Files – Introspection –		and Chalk
	Developing simple Bean Using BDK – Using Bound Properties –		board
	Using BeanInfo Interface – JavaBean API. Servlets: Background –		instruction
	Lifecycle of servlet - Simple servlet - The Servlet API -		
	javax.servlet package – Reading servlet parameters		
	<ul> <li>javax.servlet.http package — Handling HTTP requests and</li> </ul>		
	responses – Cookies – Session tracking.

## MANNAR THIRUMALAI NAICKER COLLEGE (AUTONOMOUS) DEPARTMENT OF COMPUTER SCIENCE

(For those who joined in 2021-2022 and after)

Course Name	OB	JECT ORIENTED AN	NA	LYSIS AND DESIGN	1				
<b>Course Code</b>	21F	PCSC22					L	P	C
Category	Coı	re					6	-	4
Nature of Cour	rse:	EMPLOYABILITY	✓	SKILL ORIENTED		ENTREPREN	EURS	HIP	
Course Object	Course Objectives:								
• Learn the U	ML	of OO analysis and des design diagrams.	igr	n skills.					

Learn to map design to code.
Be exposed to the various testing techniques.

Compare and Contrast the UML Diagrams with ER and Data Flow Diagrams.

Unit: I An overview of Object-Oriented systems Development: 18

Introduction - Two Orthogonal Views of the Software - Object-Oriented systems Development Methodology - Why an Object Orientation - Overview of the Unified Approach. Object Basics: Introduction - An Object-Oriented Philosophy - Objects - Objects - Objects are Grouped in Classes - Attributes - Object Behavior and Methods - Objects Respond to Messages - Encapsulation and Information Hiding - Class Hierarchy - Polymorphism - Object Relationships and Associations - Aggregations and Object Containment. Object-Oriented Systems Development Life Cycle: Introduction - The Software Development Process - Building High-Quality Software.

## Unit: II Object-Oriented Methodologies: 18

Introduction - survey of some of the Object Oriented Methodologies - Rumbaugh Et al's Object Modeling Technique - The Booch Methodology - The Jacobson et al. Methodologies - Patterns - Frameworks - The Unified approach. Unified Modeling Language: Introduction - Static and Dynamic Models - Why Modelling - Introduction to the Unified Modeling Language - UML Diagrams - UML Class Diagram - Use-Case Diagram - UML Dynamic Modeling - Model Management - UML Extensibility - UML Meta-Model.

Unit: III Identifying Use-Cases: 18

Introduction - Why Analysis is a Difficult Activity - Business Object Analysis - Use-Case driven object oriented analysis - Business Process Modelling - Use-Case model - Developing Effective Documentation. Classification: Introduction - Classifications Theory - Approaches for Identifying Classes - Noun Phrase Approach - Common Class Patterns Approach - Use-Case Driven Approach - Classes, Responsibilities and Collaborators - Naming Classes.

## Unit: IV Identifying Object Relationships, Attributes, and Methods: 18

Introduction - Associations - Super–Sub Class Relationships - A-Part-of Relationships-Aggregation - Class Responsibility: Identifying attributes and methods - Defining Attributes by Analyzing Use Cases and Other UML Diagrams - Object Responsibility:Methods and Messages - **The Object-Oriented Design Process and Design Axioms:** Introduction - The Object-Oriented Design Process - The Object-Oriented Design Axioms - Corollaries - Design Patterns.

## **Unit: V Designing Classes:**

**18** 

Introduction - The object Oriented Design Philosophy - UML Object Constraint Language - Class visibility - Designing Classes: Refining attributes - Designing Methods and protocols. **Object Storage And Object Interoperability:** Database Management Systems - Logical and Physical Database Organization and Access Control - Distributed Databases and Client-Server Computing - Distributed Objects Computing: The Next Generation of Client-Server Computing.

### **Total Lecture Hours**

90

## **Books for Study:**

1. Ali Bahrami, "Object Oriented System Development", McGraw Hill International Edition, 2008.

### Unit I

Chapter 1 - 1.1 to 1.6

Chapter 2 - 2.1 to 2.12

Chapter 3 - 3.1 to 3.3

#### Unit II

Chapter 4 - 4.1, 4.3 to 4.8

Chapter 5 - 5.2, 5.5 to 5.10

### **Unit III**

Chapter 6- 6.1 - 6.7

Chapter 7 - 7.1 to 7.8

### **Unit IV**

Chapter 8-8.1 to 8.4, 8.6, 8.7, 8.9

Chapter 9 - 9.1 to 9.5

### Unit V

Chapter 10 - 10.1 - 10.6,10.8

Chapter 11 - 11.3, 11.5

### **Books for Reference:**

- 1. Craig Larman, "Applying UML and Patterns", Second Edition, Pearson Education, 2002.
- 2. Grady Booch, James Rumbaugh, Ivar Jacobson, "The Unified Modeling Language User Guide", Addison Wesley Long man, 1999.
- 3. Bernd Bruegge, Allen H. Dutoit, "Object Oriented Software Engineering using UML, Patterns and Java", Pearson Education, 2004.

<sup>\*3.</sup> Advanced Applications 2. Intermediate Development 1.Introductory Level

## LESSON PLAN

UNIT	OBJECT ORIENTED ANALYSIS AND DESIGN	Hrs	Mode
I	An overview of Object-Oriented systems Development: Introduction Two Orthogonal Views of the Software Object-Oriented systems Development Methodology Why an Object Orientation - Overview of the Unified Approach. Object Basics: Introduction An Object-Oriented Philosophy Objects are Grouped in Classes - Attributes Object Behavior and Methods Objects Respond to Messages Encapsulation and Information Hiding Class Hierarchy Polymorphism Object Relationships and Associations Aggregations and Object Containment. Object-Oriented Systems Development Life Cycle: Introduction The Software Development Process	18	Blackboard & PPT
II	Building High-Quality Software  Object-Oriented Methodologies: Introduction survey of some of the Object Oriented Methodologies Rumbaugh Et al's Object Modeling Technique The Booch Methodology The Jacobson et al. Methodologies Patterns, Frameworks The Unified approach	18	Blackboard & PPT

	TT 400 13 # 110 T T T T		
	Unified Modeling Language: Introduction		
	Static and Dynamic Models		
	Why Modelling, Introduction to the Unified Modeling Language		
	UML Diagrams, UML Class Diagram		
	Use-Case Diagram, UML Dynamic Modeling		
	Model Management, UML Extensibility, UML Meta-Model.		
III	Identifying Use-Cases: Introduction	18	Blackboard
	Why Analysis is a Difficult Activity		& PPT
	Business Object Analysis		
	Use-Case driven object oriented analysis		
	Business Process Modelling		
	Use-Case model		
	Developing Effective Documentation		
	Classification: Introduction		
	Classifications Theory, Approaches for Identifying Classes		
	Noun Phrase Approach		
	Common Class Patterns Approach		
	Use-Case Driven Approach		
***	Classes, Responsibilities and Collaborators, Naming Classes.	4.0	D1 11 -
IV	Identifying Object Relationships, Attributes, and Methods:	18	Blackboard
	Introduction		& PPT
	Associations, Super–Sub Class Relationships		
	A-Part-of Relationships		
	Aggregation, Class Responsibility: Identifying attributes and methods		
	Defining Attributes by Analyzing Use Cases and Other UML		
	Diagrams		
	Object Responsibility:Methods and Messages		
	The Object-Oriented Design Process and Design Axioms:		
	Introduction		
	The Object-Oriented Design Process		
	The Object-Oriented Design Axioms		
	Corollaries, Design Patterns.		
V	Designing Classes: Introduction	18	Blackboard
•	The object Oriented Design Philosophy	10	& PPT
	UML Object Constraint Language		W I I I
	Class visibility		
	Designing Classes: Refining attributes		
	Designing Methods and protocols.		
	Object Storage And Object Interoperability: Database		
	Management Systems		
	Logical and Physical Database Organization and Access Control		
	Distributed Databases and Client-Server Computing		
	Distributed Objects Computing: The Next Generation of Client-Server		
l	Computing.		

Course Designed by: Dr.P.Hemavathy & Dr.M.Karthika

# Learning Outcome Based Education & Assessment (LOBE) Formative Examination - Blue Print Articulation Mapping - K Levels with Course Outcomes (COs)

Cours	e Outcomes	K Level
At the	end of the Course the students will be able to	
CO1:	Understand the basic concepts of Linux operating system.	K3
CO2:	Understand Scheduling of operating system.	K3
CO3:	Study I/O management, Memory Management and File System and Distributed Systems	K4
<b>CO4:</b>	Understand the system level and support required for Distributed System.	K4
<b>CO5</b> :	Learn Synchronization and Deadlock	K4

## **CO & PO Mappings:**

## MANNAR THIRUMALAI NAICKER COLLEGE (AUTONOMOUS) DEPARTMENT OF COMPUTER SCIENCE

(For those who joined in 2021-2022 and after)

<b>Course Name</b>	AVANCDED JAVA PROGRAMMING LAB			
<b>Course Code</b>	21PCSCP3	L	P	С
Category	Core	-	6	4

Nature of Course: | EMPLOYABILITY | ✓ | SKILL ORIENTED | ENTREPRENURSHIP

## **COURSE OBJECTIVES:**

- To get hands on experience in developing applications in OOPS Concepts.
- Learn the basics of Inheritance and its types.
- Experiment the exception handling techniques.
- To implement thread and its types.
- Be exposed to the various advanced java techniques.

S. No.	List of Programs	Hours
1.	OOPS - Class, Objects.	90
2.	OOPS – Polymorphism, Encapsulation.	
3.	Inheritance and types.	
4.	Strings.	
5.	Exception Handling.	
6.	Threads.	
7.	Applets.	
8.	RMI - Invocation of server side methods	
9.	Servlets - Returning Information received from the client.	
10.	Client/Server Programming	
11	JSP - use of java beans.	
12	EJB – Session Bean.	
13	EJB – Entity Bean	
	Total Lecture Hours	90

## **Books for Study:**

## **Books for Reference:**

## **Web Reference**

- 1. <a href="https://www.oracle.com/tools/technologies/building-j2ee-web-applications.html">https://www.oracle.com/tools/technologies/building-j2ee-web-applications.html</a>
- 2. https://pdfslide.net/documents/j2ee-lab-manual.html

COUI	RSE OUTCOMES	K Level
At the	end of the Course the students will be able to	
<b>CO1:</b>	Ability to understand the Java	K2
CO2:	Understand the usage of Exception Handling	K2
CO3:	Ability to implement the concept of servlets, client and server based applications	K2

<b>CO4:</b>	Examine the use of Controls in Applet and GUI	K3
<b>CO5</b> :	Develop Servlets, JSP and Net Beans Applications	K3

## **CO & PO Mappings:**

Category	No	n Major Elective					-	6	6
Nature of Cou	rco.	EMPLOYABILITY	✓ CKII I	ORIENTED	<b>√</b>	ENTREDRI	TIII	рспі	D

## **Course Objectives:**

- Introduces the basic features of Microsoft Office
- Develops familiarity with Word, Excel, PowerPoint, email, and Internet basics.
- Learn the definition of the Internet and World Wide Web
- Understand how to access the Internet and Web
- Perform Internet and Web-related tasks, including email, searching, and communicating accurately using real-world tools

S. No.	List of Programs	Hours
1.	.Create webpage with Colorful text and Background color using HTML	90
	tags.	
2	Create Ordered list and Unordered List of data using HTML tags.	
2. 3.	Create College Time Table using HTML. Also put Border around the table.	
3. 4.	Create Internal and External Hyperlinks.	
5.	Implement the concept of Frames.	
6.	Create Login Form	
7.	Display image on the web browser with hyperlink	
8.	Design Bio data	
9.	Create webpage with different style sheet	
10. 11	Create webpage with all character elements in html	
12	.Create CSS program to display text with color	
13	Create CSS program Display text with Background color	
14	Create CSS program Display text with border	
15	Create CSS program Display with text box	
16	. Create CSS program Display image with text	
17	Create CSS program Display image with box	
18	Create Online Application Form	
19 20	Create Simple Website for on line shopping.	
	Total Lab Hours	90
