### **CAREER SUMMARY**

- ✓ Having 3+ Years of Experience in Developing Web based and Mobile based Backend Enterprise Application using React JS, GraphQL, Mongo DB, NodeJS, NestJS, ExpressJS, Redux, AWS Services, Nextjs
- ✓ Maintained and enhanced existing React systems by identifying and resolving bugs, implementing performance optimizations, and ensuring code quality.
- ✓ Designed and developed new custom components to meet project requirements, improving user experience and functionality.
- ✓ Conducted code reviews and implemented best practices to ensure high-quality codebase. Implemented responsive designs.

### **PROFESSIONAL SUMMARY**

**Lithi Infotech (Dec 2024 – Present)**

**Founder / CO CEO**

- Leading the development and architecture of scalable SaaS products, cloud solutions, and enterprise applications.
- Overseeing frontend and backend development using Next.js, Node.js, React.js, AWS, GCP, and Azure.
- Driving business strategy, product innovation, and technical leadership to scale operations.
- Managing and mentoring a team of developers, DevOps engineers, and cloud architects.
- Developing AI-powered solutions, including LLM integration, RAG-based AI models, and chatbots.
- Spearheading multi-vendor platforms, B2B2B SaaS products, and IT staffing solutions.
- Handling cloud infrastructure, DevOps, Kubernetes orchestration, and Infrastructure as Code (IaC) with Terraform.
- Ensuring secure API development, microservices architecture, and real-time data processing.
- Overseeing client acquisition, investor relations, and business expansion strategies.

**Tita Technologies (Jul 2024 – Dec 2024)**

**Software Developer**

- Developed and maintained web-based and mobile backend enterprise applications using Node.js, React.js, and AWS.
- Worked on integrating complex features like AI-powered modules, JIRA tracking, and custom reporting.

- Spearheaded the design and implementation of a SaaS platform, improving internal communication and operational efficiency.
- Ensured that cloud-based services and databases (AWS, DynamoDB, PostgreSQL) met scalability and performance requirements.

#### **Lithi Infotech (Oct 2023 – Jul 2024)**

##### **Software Developer**

- Led the development of internal and client-facing web applications, focusing on backend technologies like Node.js and PostgreSQL.
- Responsible for cloud infrastructure using AWS services like EC2, S3, and RDS.
- Worked on integrating Web3 functionalities for blockchain-based platforms.
- Contributed to the development of products in various sectors, including e-commerce, finance, and entertainment.

#### **Tring Apps (oct 2022 – Oct 2023)**

##### **Junior Software Developer**

- Assisted in the development of applications using React.js, Node.js, and AWS.
- Worked on maintaining and optimizing existing systems for improved performance and scalability.
- Developed custom components and integrated third-party APIs to enhance functionality.
- Participated in the full project lifecycle, from requirements gathering to deployment and post-launch support.

## **PROJECT REPORTS**

### **PROJECT I:**

#### **NCMG - IIOT-Based Monitoring System**

**Description:** As the lead developer of an IoT device management system, I orchestrated the development of a comprehensive platform that facilitates the monitoring and control of connected devices. The system employs MQTT for efficient communication between devices and the server, with data being stored securely in a distributed NoSQL database. Implemented robust data validation mechanisms to ensure data integrity and consistency during the conversion process.

**Technologies Used:** PostgreSQL, Node.js, MQTT, Express JS Azure, Docker Load Balancing

### **PROJECT 2:**

#### **The citizen Tech – WEB3:**

**Description:** Citizen Tech, a revolutionary platform empowering user to engage in independent speech and advance their causes through campaigns. This innovative app not only facilitates user-driven campaigns but also introduces the concept of MIT crypto, providing a unique and decentralized medium for financial transactions within the platform. citizen tech allows users to speak independently and do campaigns in advance they can purchase the MIT crypto in this app and sell it whereas they can login via MetaMask wallet web 3 login and buy and sell nfts, making the campaigns and groups to be act publish citizen.

**Technologies Used:** Web 3, MetaMask wallet, Tailwind CSS, Ethers, ReactJS, Nodejs, DynamoDB, AWS S3

### **PROJECT 3:**

#### **Film Manga Series Site Platform:**

**Description:** Develop a dynamic and user-friendly web platform using ReactJS and Nodejs Dynamic API's, hosted on AWS S3 and EC2, dedicated to the passionate world of film, manga, and series enthusiasts. This platform aims to provide a comprehensive and engaging experience for users to explore, discuss, and discover their favorite films, manga, and series.

**Technologies Used:** ReactJS, Redux, SQL, SASS, Node JS, EC2, AWS LAMDA, Load Balancing, S3, MongoDB.

### **PROJECT 4:**

#### **Chat Application:**

**Description:** As the lead developer for a cutting-edge private chat application, I spearheaded a comprehensive project that prioritizes responsiveness across web platforms. Leveraging React components, I crafted an intuitive and visually appealing user interface, ensuring a seamless and enjoyable communication experience for users. Saving up data on Cloud and fetching through API storing in encrypted to database.

**Technologies Used:** React.js, SASS, SQL, Node JS. Kafka, Zookeeper

### **PROJECT 5:**

#### **Hybrid data conversion from SQL to NOSQL- SAAS PRODUCT**

**Description:**

Developed and integrated APIs to facilitate secure data exchange between the client and server. The APIs handle data retrieval, updates, and synchronization efficiently, ensuring real-time communication capabilities. Utilized JSON for data serialization and deserialization, enabling efficient and lightweight data interchange between the client and server. Implemented encryption protocols for data stored both in the cloud and locally, safeguarding sensitive user information from unauthorized access

**Technologies Used:** NodeJS, DynamoDB, ExpressJS, AWS-SDK, PostgreSQL

**PROJECT 6: OTT Streaming Platform for Movies and Videos****Description:**

As the lead developer, I built a high-performance OTT (Over-The-Top) streaming platform that allows users to stream movies and videos seamlessly across devices. The platform features user authentication, content categorization, personalized recommendations, and adaptive bitrate streaming for a smooth viewing experience. The backend, powered by Node.js and Express.js, handles user requests, manages subscriptions, and delivers video content efficiently via RESTful APIs. PostgreSQL is used to store user data, subscription details, and media metadata. I also implemented a video encoding pipeline to optimize video formats and ensure smooth streaming across different bandwidths.

**Technologies Used:** Node.js, PostgreSQL, Express.js, AWS S3 for video storage, CloudFront for CDN, FFmpeg for video encoding.

**PROJECT 7: BOXSY:**

**Description:** Boxsy is a platform designed to facilitate the onboarding of new startup companies while also providing tools for raising funds for their development. The architecture of Boxsy is based on the Hexagonal Architecture, promoting a clean separation between the application's core logic and its external interfaces. This ensures that the system is modular, maintainable, and easily testable.

**Technologies Used:** Next.js, Nestjs, TypeScript, TypeORM, PostgreSQL, Stych, Infisical.

**PROJECT 8:****All-Caps:**

**Description:** Allcaps is an AI-driven platform that streamlines deal-making by generating estimates and connecting users with the appropriate officials for negotiations. Its integration with Zoom enhances real-time communication, making the negotiation process efficient and seamless. The platform's unique combination of AI capabilities and real-time communication tools provide users with a streamlined experience, reducing friction in the deal-making process and ensuring effective collaboration. Its modern tech stack ensures responsiveness and user friendliness, catering to the dynamic needs of users.

**Technologies Used:** Next.js, Tailwind CSS, Python, Go, React, ShadCN, Zoom Integration

**Declaration:**

I hereby declare all the statements provided are true to my knowledge and I bear responsibility for the correctness of above particulars.
